

Making ID Card Copies

6FRA-04A

1660-048

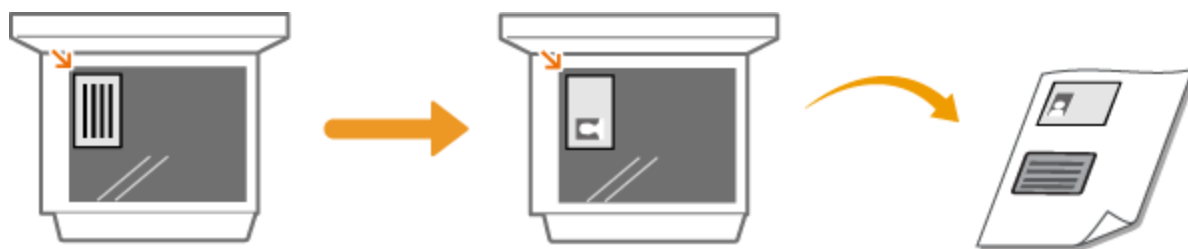

You can use <ID Card Copy> to copy the front and back sides of a card onto the same side of a page. This function is useful when copying a driver's license or ID card.

NOTE

<Copy Ratio> is automatically set to <100% Direct>.

Place the card on the platen glass ▶ <ID Card Copy> ▶ <Start> ▶ Turn the card over ▶ <Scan Next>
