

Canon ImageRUNNER Advanced: Installing Mac Print Driver

1. Open www.usa.canon.com and select **Drivers and Downloads**.
2. Search for the specific Canon model.

3. Select the recommended driver from Canon and download.

4. Open the downloads folder and select the **.dmg** file. A new finder window will appear.
5. Select the **.pkg** file to run the installer wizard.

6. Follow the steps in the **wizard** and log in when prompted.

QUICK GUIDE

LOFFLER

7. When wizard is complete, select **Move to Trash** when prompted.
8. Open **System Preferences**, then select **Printers & Scanners**.
9. Select the **+** sign to add a printer.
10. Select **IP** tab. Enter the IP address.
 - To find the IP address at the machine: Settings/Registration >> Preferences >> Network >> Output Report and a report will print with the IPv4 address.
11. Set the Protocol line to **Line Printer Daemon** and type **print** into the Queue line.
12. Name the printer.
13. In the Use line, select the drop down and press **Select Software...**
14. Type in the model in the search menu, then select **OK**.
15. Select **Add**.
16. Select **Options and Supplies**.
17. Select **Options**.
18. Enter the machine's additional options, then select **OK** to save.

****Note:** Print drivers are set to 2-sided and color by default. For assistance changing default settings, please contact the Loffler service department. Contact information is located on the red sticker on the front of the device.
