LOFFLER

Lexmark: Installing Windows Print Driver

1. Search for Lexmark drivers in a preferred internet browser and select drivers and downloads.

2. Type in the model of the Lexmark.

3. Select the computer's operating system from the drop down.

4. Select version from the drop down.

5. Select the language of the print driver and press submit.

6. Select the driver.

7. Press I Agree – Download.

8. Open the downloaded file and extract.

9. Open file and press Install.

10. Follow the steps in the wizard.

11. If the machine automatically finds the IP address, finish the installation. If it does not, continue onto the next steps.

12. Select **My printer is not listed…**

13. Select Host/IP Address Search.

14. Enter the machine's IP address.

    - If unknown, follow the steps in the machine's user manual which can be found at www.support.lexmark.com.

15. Press OK and the wizard will search for the IP address.

16. Press Next once found.

17. Press Finish to complete the installation.
